Summary

I am a driven self-learner following a passion for design and a love of writing code. I enjoy building websites and applications with focus on UI and I always want to learn more and continue to grow.

My skills include HTML/CSS, JavaScript, React, Postgres and Node. I have experience from earning certificates in the areas of Algorithms, Data Structures, Frontend Development Libraries, and Responsive Web Design. I have used Git version control to keep myself aligned with my personal progress goals.
