<https://bit.ly/idmillr>

Summary

I am a driven self-learner following a passion for design and a love for writing code. I enjoy building websites and web apps with emphasis on the user experience. I always appreciate a nice UI.

My skills include HTML, CSS, JavaScript, and React on top of Postgres and Node. I have experience from earning coursework certificates in the areas of JS Algorithms & Data Structures, Frontend Dev Libraries, and Responsive Web Design. I have used Git/GitHub to track my progress and store notes, tutorials, projects, etc., and my Github heat-map keeps me honest in adhering to reliable self-learning habits.

I am currently exploring Authentication and Authorization concepts.
