## Summary

I am a driven self-learner following my passion for design and my love of writing code. I enjoy building websites and web applications and I appreciate every second it takes to create a beautiful UI.

My skills include HTML, CSS, JavaScript, and React. I have experience from earning certificates in the areas of Algorithms, Data Structures, Frontend Development Libraries, and Responsive Web Design. I have used version control (<https://github.com/indmillr>) to track my progress, store notes, tutorials, projects, etc. The heat-map for daily commits is how I keep myself consistent in adhering to my continued learning style.

The next goal I have for myself is to gain more knowledge and experience with Node and Postgres and I also plan to build a related project inside a Docker container.

Some notable items from my leadership history as a General Manager for Southern Rock Restaurants:

- 7+ years remote COGS/inventory auditing for 40+ units across 4 states
- 12+ years facilitating teamwork within single-unit operation
- Numerous performance/results-based awards
- Responsible for interviewing, onboarding, training, and accountability of a group of approximately 30 subordinates
- 17+ years management history highlights my loyalty, problem solving, and adaptability to business environment changes over time
- Comfortable with communication with new-hires, CEOs, and everyone in between

## Education

**Ozarks Technical Community College**

Associate of Arts, Accounting and Business/Management

2007 - 2011

## Licenses & Certifications

**Responsive Web Design** - freeCodeCamp

**JavaScript Algorithms and Data Structures** - freeCodeCamp

**Front End Development Libraries** - freeCodeCamp

## Skills

HTML • Cascading Style Sheets (CSS) • JavaScript • React.js • User Interface Design • User Experience (UX) • GitHub • Self Learning • Time Management • Front-End Development
